Your Life Is Riding On It

Tire Maintenance: 3 Things You Can Do

- Check air pressure monthly with an air gauge.
- Rotate your tires every 5,000 to 8,000 miles.
- Examine the tread on your tires for wear. Try this test: Place a Lincoln penny upside down between treads and facing you. If you can see the top of Lincoln's head, then it's time for new tires.

— National Highway Traffic Safety Administration

In the U.S. ...

- 1 in 4 cars has at least one tire that is significantly underinflated
- 11,000 tire-related crashes happen each year
- Driving on worn tires at highway speeds in wet conditions increases stopping distance by as much as 87 feet

— NHTSA/AAA

In Texas ...

Last year, defective or slick tires contributed to:

- 76 fatal crashes
- 4,159 total crashes

— Texas Department of Transportation
