Drugged Driving

On the Rise: It's Not Just Illegal Drugs

- In Texas, DUI-drug crashes increased by 4% in 2016
- Prescription and over-the-counter medications can impair drivers
- In the U.S., 60 people die every day of opioid overdoses

— TxDOT, National Safety Council

Survey Says

- 20% of drivers tested positive for drugs
- 47% rise in the number of drivers who tested positive for marijuana
- 25% increased likelihood a marijuana user to be involved in a crash

— National Highway Traffic Safety Administration, 2014

Safe Driving

Requires precise skills:

- Clear judgment
- Concentration
- Ability to react

IMPAIRED DRIVING

Save a Life

Enough prescription painkillers were provided in 2010 to medicate every American around the clock for an entire month. This means that at any given time, many employees may be using **prescription painkillers on the job.**

What should you do if you notice a coworker in trouble?

IMPAIRED DRIVING

Save a Life

Prescription medications are helpful in the right doses, at the right time, and when the user is aware of all potential side effects.

What are some of the dangers of prescription medicine?
