Pedestrians and PARKING LOTS

Bake Cookies: Vehicle Experiment

- Put cookie dough on parchment paper on cookie sheet
- Place the pan of cookies on dashboard
- Use a thermometer; ensure vehicle temperature reaches at least 165 °F (70 °C) to kill germs
- Shut doors, sun begins baking immediately
- Edges should be firm, and centers should be set, cookies will slide off easily when done

Experiment with cookies, not people or pets

Heads Up PEDESTRIANS Avoid Distractions

In 10 minutes
a car's
temperature
can rise almost
20 degrees

**Never leave a child or pet
alone in a vehicle**

Almost one-quarter of child
heatstroke deaths in
vehicles have occurred at a
place of work

Nearly 900 kids have died of pediatric
vehicular heatstroke since 1998

**Parking Lots + Pedestrians + Vehicles
= DEADLY COMBINATION**
